

DAR250 After Effects Project 1

Create a project that uses animated text to convey an important idea, thought or feeling. You can animate a famous quote, song lyrics, poetry or something original.

Include sound and imagery. You can create shapes in After Effects, import images or video. You can import instrumental music or music with lyrics that are synchronized to your animations.

Your project should be at least 30 seconds long but no longer than 2 minutes.

Render (output) your final movie to a .mov (.avi for you Windows people) file and upload it to your Google Drive folder. Make sure your name is on the file.

Keep in mind that if you eventually want to put this in a portfolio that you will use to try to get work, you should use copyright-free music and images. If you are doing it for school only, you can use a small amount of copyrighted material (this is called “fair use”). See the Resources section of the class website for links to copyright-free material.
